

Empowering senior living communities with IT solutions that work for your business

*Responsive. Innovative. Dynamic.*

Uninterrupted access to the internet with a **powerful and reliable Wi-Fi network** ensures immediate access to vital clinical information, continuous business operations, and programming for resident engagement.

Responsive support team continually **tracking ongoing issues and making proactive changes** behind the scenes to prevent continuous occurrences.

**Managing low voltage systems** with vendor partners, such as emergency call, that are necessary for life safety and resident care in senior living.

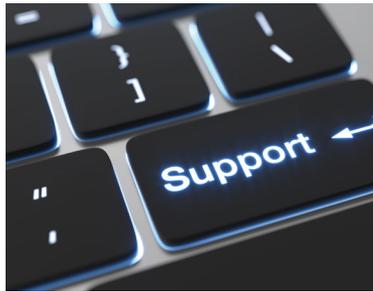

## Assurance that the technology powering senior living communities remains operational, 24/7

Technology advances have substantially enhanced the complexity of technology to operate a community – that is when they are working seamlessly and without interruption. Many communities are not equipped with the expertise to keep these systems operational, which can be a drain on resources.

Understanding the nuances and needs of senior living differentiates Tazergy from traditional Managed Services Providers (MSP). The ITaaZ team (our variation of “TaZergy” and “IT as a Service”) understands the technology that is required to provide quality care and engaged living. Recognizing the daily challenges presented to caregivers, Tazergy’s goal is to make sure all of the technology is fully functioning.

# A technology partner that has you covered

ITaaZ support services are all encompassing and cover more than computers and printers. Unlike other providers, Tazergy serves as a technical advocate and trouble shoots processes of other peripheral systems such as eMAR (Electronic Medication Administration Record), emergency call, audio/video, security, carrier services, and infrastructure. Backed by decades of expertise, Tazergy works with senior living operators to plan and manage their technology needs.

## Supporting ALL of your technology systems

### IT Community Support Services

Proactive and reactive managed IT Services. Tazergy helps prevent upcoming IT issues as well as assist community staff with any reactive IT requests.

### Technology Advocate

Tazergy speaks technology so that your care staff doesn't have to. When there is an issue with an outside IT vendor, Tazergy jumps in so that the onsite team can get back to doing what they do best, caring for your residents.

### Technology Partner

Tazergy helps you assess your current technology plan to then create a future plan with a technology roadmap and budget for the future.

### Procurement Services

When purchasing new equipment, Tazergy provides competitive pricing for major technology vendors and manufacturers.

## Connected IT

Turn to Tazergy to help keep senior communities functioning with seamless operations, engaged living, and the highest level of care that works for everyone, without interruptions in connectivity.
